

PU Foam Additives

PCT offers a wide range of high-quality, PU foam additives designed to provide stable processing and excellent control of critical foam performance properties across a wide range of applications.

Product	Description	Application Areas
A-600	Anti-Static Additive	Electronics Packaging Foam
D-1200	HR and Low-Index Stabilizer	Molded and Free-Rise HR Foam, and Soft/Low-Density Foam
MT-404	Mint Green Tea Additive	Fresh Foam Additive for Odor Control in All Foam Types
NE-20	Bed-bug Inhibitor Additive	Bedding Foam
OC-1030	Odor Absorption and Masking Agent	Reducing New-Foam Odor in All Foam Types
SP-1000	Glass Transition Modifier	Viscoelastic Foam
SP-1000LF	Low-Freeze Glass Transition Modifier	Viscoelastic Foam
SRT-500	Strut Reinforcing and Die Cutting Improvement	Conventional and Energex™ Foams
UV-50	UV Stabilizer	Protection against Slow Yellowing of PU foam
V-100	Antimicrobial Additive	Bacterial and Fungal Control in Conventional and Bedding Foam
ZPT	Antimicrobial Additive	Primarily Fungal Control in Conventional and Bedding Foam
