

Polyols

PCT offers a collection of unique polyols that have revolutionized the PU foam market with a novel open-cell polymer design. For viscoelastic foam, we offer a choice between the great simplicity of a single polyol (SP-7600) to produce a full spectrum of open-cell memory foam and the versatility of a 2 or 3 polyol system for unparalleled control of physical properties. PCT polyols are designed to produce a wide range of specialty foam products with stable processing and very consistent physical properties.

Polyol	Description	Application Areas
SP-170	Open-Cell Viscoelastic Foam Polyol	MDI-Based Open-Cell CoolFlow™ Memory Foam
SP-7600	Open-Cell Viscoelastic Foam Polyol	MDI Based Bedding Foams, Pillows, Specialty Memory Foams
SP-168	Viscoelastic Foam Polyol	TDI & MDI Based Memory Foam
SP-238	Viscoelastic Foam Polyol	TDI & MDI Based Memory Foam
SP-2744	Polymer Polyol (42-44% Solids)	Viscoelastic & High Load Bearing Foams
SP-3252	Conventional Foam Polyol	Furniture & Bedding Foams
SP-56	In-situ Reticulated Foam Polyol	Outdoor Furniture Cushioning, Marine & Outside Specialty Foams
SP-2900	Clear HR Polyol for Molded and Free-Rise HR Foam	Molded & Free-Rise Furniture, Bedding HR Foam
BP-164	Bio-Polyol for Conventional and Viscoelastic Foam	Furniture & Bedding Foams
