

# Surface Infusion Technology

## Product Description

### Superior Thermal Properties

- Breathable layer of extremely cool gel concentrated on foam surface
- Significantly improves heat capacity and conductivity
- Maintains foam air flow and moisture transmission
- Greatly enhances cooling without adding excessive weight

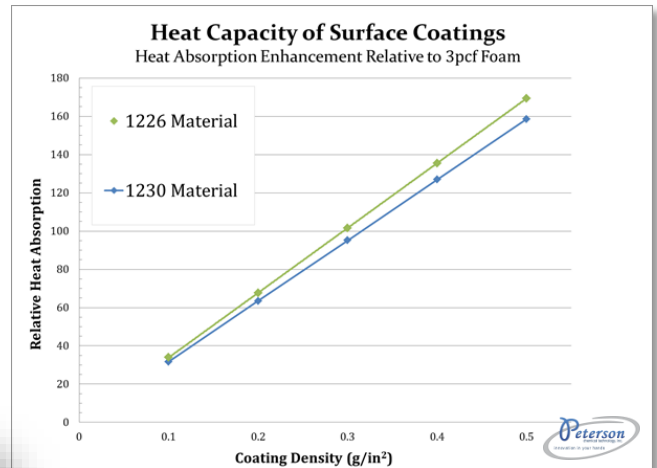

### User Friendly Technology

- Variable colors and coating thicknesses
- Printable surface for logos or other images
- Adjustable coating thickness
- Can be applied by roll coating or spraying
- Durable with excellent dynamic fatigue properties
- Clean and odor-free material

### Excellent carrier of various thermal modifiers:

- PCM-280
- LumaCool™
- HC-95 Graphene
- Black Diamond™
- Ceramic Cool™

### Extensive Application Areas:

- Mattress layers
- Toppers
- Seat Cushions
- Pillows
- Other Comfort Products
